MANAGER COMMENT

Economies around the world started to reopen and vaccine rollout plans gathered momentum during April, with the economic growth expectations at the start of the year coming to fruition. Over the course of the last year most markets have made a remarkable recovery since hitting lows at the start of the pandemic. The focus will now be on the degree to which inflationary pressures are as transitory as central bankers are flagging, or whether the growth will translate to more persistent price increases.

Developed market equities gained in April with the US leading the way, supported by a robust vaccine rollout and fiscal stimulus measures.

The MSCI World Index gave South African investors 2.69% m/m in April and 13.09% y/y in rand terms. In dollar terms the MSCI World returned 4.52% for the month and 43.16% for the year to end April. Emerging market equities recorded a gain in April aided by dollar weakness but underperformed developed markets. Covid-19 continues to be a concern in several emerging market countries and thus returns were relatively muted. The MSCI Emerging Market Index returned 0.58% m/m in rand terms and 15.09% y/y to end April, and returned 2.37% for the month and 45.70% for the year to end April in dollar terms.

South African equity markets were no exception to the global market rally, with equities clocking in a sixth-consecutive monthly gain. In April the All Share Index (ALSI) produced a return of 0.97% m/m and 36.40% for the year to end April. This has been the longest winning streak for local equities in over six years. The April gains were largely thanks to the diversified miners, with the resource sector returning 2.93% m/m and an extraordinary 59.79% for the year to end April. Industrials were down 1.35% m/m for April but still managed to return 23.04% on a yearly basis, while Financials recorded a solid 1.70% m/m and 23.42% for the year.

Property stocks had a stellar month, returning 11.68% m/m and 40.33% for the year to end April. The SA 10-year government bond yield followed global yields lower, ending April at 9.3%, and we saw the All Bond Index return 1.90% m/m and 14.68% for the year. The STeFI came in flat in April, returning 0.30% m/m and a paltry 4.34% for the year.

The rand strengthened 26.59% against the US dollar, 15.18% against the euro and 15.33% relative to the sterling over the 12 months to end April. On a monthly basis the rand was up 1.78% relative to the US dollar, down 0.63% to the euro and strengthened 1.43% to the sterling.
