MANAGER COMMENT

Following a dreadful 2022, most global markets kicked off 2023 strongly as equity markets rallied, including locally. Investor sentiment was boosted by better-than-expected GDP data, inflation slowing for the third consecutive month, the hope that interest rates are close to their peak and the belief that the US will avoid a recession. Furthermore, optimism around China's economic recovery was another positive headline during the month.

Developed equity markets started the year strongly, the first positive start to the year since 2019. The MSCI World Index returned 7.0% m/m in USD and 9.6% m/m in ZAR. The laggards of 2022 managed to start the year as the best performers, with technology stocks bouncing back after a horrid sell-off in 2023. The tech-heavy Nasdaq rose by around 11.0% m/m. The S&P 500 closed at 6.28% m/m. Despite the poor economic data coming out of the UK, the UK's blue-chip FTSE (£) rose by 4.5% m/m. The surprising resilience of the Eurozone economy reflected through the latest economic data and prospects of a mild winter helped push the Euro Stoxx 50 (€) 9.93% higher m/m.

Emerging equity markets outperformed their developed counterparts for the third consecutive month, the MSCI Emerging Markets Index closed at 7.85% m/m in USD and 10.47% in ZAR. The result primarily driven by Chinese stocks, which continue to benefit from the optimism around the prospects that the world's second largest economic activity will normalize as the country emerges from its zero-Covid restrictions. As a result, foreign listed Chinese stocks were the biggest emerging market winners.

The South African equity market followed world markets higher, mainly due to renewed optimism around China's economic growth prospects. The FTSE/JSE All Share Index closed at 8.89% m/m, breaking through the psychological 8000 index level for the first time and reaching new record highs.

All major sectors finished the month in the "green". Industrials led the pack, closing at 13.37% m/m, with gains from its biggest constituents, Prosus (around 17.00% up m/m) and Naspers (around 18.00% up m/m). Financials returned 10.85% m/m, while Resources lagged closing at 7.10% m/m. SA Listed Property's three-month winning streak ended, closing 1.00% down. Local bonds continued to gain in the high interest rate environment, with the All Bond Index (ALBI) returning 2.94% m/m. Cash (STeFi) delivered a moderate return of 0.58% m/m. South African growth managers (11.48% m/m) outperformed value managers (5.88% m/m) once again, consistent with what occurred globally.

The ZAR weakened against the USD, despite a generally soft month for the greenback against most currency pairs. The ZAR was one of three major currencies to weaken against the USD, closing -2.10% m/m. Sentiment towards the ZAR was not helped by the impact that one of the most severe bouts of power outages is expected to have on the local economy. The ZAR lost 4.60% and 4.06% m/m against the sterling and euro, but managed to eke out an 1.46% m/m gain against the Japanese yen.
