MANAGER COMMENT

The US economy expanded at an annualised rate of 4.9% in the third quarter of 2023, mainly due to the expansion of job opportunities for the unemployed. The European Central Bank (ECB) kept interest rates unchanged at 4% at its October meeting, despite a weak economy. The decision to pause rates was taken after PMI data showed a slowdown in economic activity as well as a continued drop in inflation. Eurostat reported a euro zone economic contraction of 0.1%, which was below consensus estimates for GDP to remain unchanged from the previous quarter.

US Federal Reserve (Fed) Chair Jerome Powell indicated the Fed was taking a balanced approach to monetary policy and revealed a more dovish perspective ahead of the November meeting of the Federal Open Market Committee (FOMC). The International Monetary Fund (IMF) forecast that global growth would slow from 3% in 2023 to 2.9% in 2024. Hamas launched a major attack on Israel in early October: concerns that this would escalate into a regional conflict caused almost a 4% increase in Brent crude oil prices to around US\$88 per barrel and 1% rise in gold prices. The South African Reserve Bank (SARB) warned that strained public finances were obstructing economic growth. It said reducing public debt to sustainable levels could yield benefits, including a lower cost of capital, reduced debt-service costs, and lower inflation.

Global equity markets ended negatively for the third consecutive month, with the MSCI World Index at -2.9% in dollar terms, resulting in a decline of almost 10% since the end of July. Euro zone shares also underperformed, along with UK equities, in October. Short-term fixed interest rates were in positive territory, with the SteFI Composite Index ending at 1.2% month-on-month (m/m) in dollar terms. Global Bonds ended in negative territory at -1.2% m/m and Global Property was also negative at -4.75% m/m. Emerging markets underperformed, with the MSCI Emerging Markets Index ending the month at -3.88% m/m in dollar terms. The Dow Jones declined to end the month at -1.26% and the S&P 500 also ended the month negatively at -2.1%, both in dollar terms.

The South African equity market matched global equity markets in producing a third consecutive negative month in October. The FTSE/JSE All Share Index fell -3.44% m/m in rand terms, dragging the bourse further into negative territory at -1.33% year-to-date (YTD). The JSE Top 40 also underperformed, ending the month at -3.67%. Industrials ended the month at -4.58% but are in positive territory for the year to date, at 5.64%. Resources were also negative for the month, ending at -4.31%, and Property was -2.98%. Financials were down -2.15% m/m, but Cash ended positively at 0.7%. The rand gained by 0.49% m/m against the US dollar, 0.66% m/m against the euro, 1.08% m/m against the British pound, 0.54% against the Japanese yen and 0.003% against the Australian dollar. In the bond market, the FTSE/JSE All Bond Index ended in positive territory at 1.71%, with bonds of 1-3 years ending the month positively at 1.07%. Bonds of 3-7 years ended the month at 1.32%, with bonds of 7-12 years at 1.79% and bonds of over 12 years at 1.99%.
