## MANAGER COMMENT

Most global markets finished the month of March (and Q1 2023) in positive territory, showing resilience in a highly volatile month. This is despite the banking mini-crisis, fears of contagion in the US banking sector and persistent concerns that higher interest rates will trigger a global recession. Locally, the JSE was among a minority of major global markets to end the month lower, however it still performed well enough to remain in the "green" for the quarter.

Developed equity markets ended the quarter on a positive note, with the MSCI World Index returning 2.83% m/m in USD and -0.61% m/m in ZAR. This result also marked the first time we have witnessed back-to-back positive quarters for equity markets in almost two years. The tech-heavy Nasdaq 100 index was amongst the best performing in March. The S&P 500 closed 3.67% higher m/m, despite the mini-banking crisis experienced in the US. European equities pushed higher for the third consecutive month, with the Euro Stoxx 50 (€) closing 2.01% higher m/m. UK equities underperformed their global counterparts during the month, with the UK's blue-chip FTSE (£) falling by 2.84% m/m.

Emerging markets fared slightly worse than their developed counterparts for the second consecutive month. The MSCI Emerging Markets Index closed 2.73% higher m/m in USD and 0.71% lower m/m in ZAR.

The South African equity market ended lower in March for the second consecutive month, with the FTSE/JSE All Share Index closing 1.26% lower m/m. Companies geared towards the domestic economy were amongst the worst performing, with concerns around the impact of increasing costs related to operating under the country's severe load shedding conditions. JSE-listed banks were also dragged lower as confidence in the global banking system diminished.

On a sector level, Resources led the pack, benefitting from a rebound in gold and other commodity prices, closing 2.85% higher m/m. Financials gained slightly, closing 1.63% higher m/m, while Industrials lagged, falling 0.65% m/m. SA Listed Property fell for the third consecutive month, closing down 3.39% m/m. Local Bonds gained in the high interest rate environment, with the All Bond Index (ALBI) returning 1.32% m/m. Cash (STeFI) delivered a moderate return of 0.61% m/m. South African growth managers (1.13% m/m) outperformed value managers (-3.73% m/m), consistent with the global experience.

The rand benefitted from a combination of a weaker dollar and the SARB rate hike surprise, appreciating by 3.46% m/m. The rand also gained as much as 1.30% and 0.99% m/m against the sterling and euro respectively. However, the rand lost 2.29% m/m against the Japanese yen.
