MANAGER COMMENT

Both the UK and Japan moved into a technical recession in Q4 2023 after posting two consecutive quarters of negative economic growth. UK Prime Minister Rushi Sunak is under pressure to find ways to stimulate the UK economy and address the country's cost of living crisis. Japan battled with high economic uncertainty and inflation, which weighed heavily on private consumption and foreign investment.

US inflation rose more than expected in January because of stubbornly high shelter prices which impacted consumers. A preliminary Reuters poll showed that China's manufacturing activity contracted in February as factory owners struggled to secure local and international orders. Eurozone business activity fell for the ninth month in a row, but the rate of decline eased in January.

In SA, President Cyril Ramaphosa delivered his State of the Nation Address and Finance Minister Enoch Godongwana presented the National Budget. In these speeches, government updated citizens on the steps it will take to move the economy in the right direction.

After a positive start to 2024, global equity markets accelerated in February, with the MSCI World Index ending the month at 4.24% in dollar terms. Emerging markets (EMs) underperformed developed markets (DMs) for four consecutive months before February but managed to slightly beat DMs, with the MSCI EM Index ending positively at 4.77% month-on-month (m/m) in dollar terms. Chinese equities rallied strongly due to economic stimulus and contributed to the performance of the MSCI EM Index. Although it was announced that Japan slipped into a recession, the Nikkei still managed to end the month positively at 7.99% in yen terms. Both Global Bonds and Global Property entered negative territory at -1.26% m/m and -0.55% m/m in dollar terms. Tech stocks contributed to the S&P 500's positive performance of 5.34% m/m in dollar terms, with Nvidia, Meta and Amazon being the top contributors. The Dow Jones Index was positive at 2.5% m/m in dollar terms and the FTSE gained 0.19% m/m in pound.

The South African stock market was in negative territory in February, when the FTSE/JSE All-Share Index ended at -2.44% in rand terms. Industrials and Financials were negative, at -0.79% m/m and -1.2% m/m, but Resources was the biggest laggard, at -6.92% m/m. Local Property and Cash were both positive for the month, at 0.82% and 0.65% respectively in rand. The bond market underperformed, with the FTSE/JSE All-Bond Index ending at -0.58% m/m in rand terms. Bonds of 1-3 years ended the month at -0.04%, with bonds of 3-7 years at -0.88%, bonds of 7-12 years at -0.78% and bonds of above 12 years ending at -0.53%.

Expectations of sustained higher US interest rates boosted the dollar, which was stronger against all major DM and most major EM currencies in February. The rand was among the worst-performing currencies. It depreciated against the US dollar by -3.05% m/m, the euro by -2.68% m/m and the pound by -2.4% m/m. However, the currency appreciated against the Japanese yen by 2.39% m/m.
